Risk Assessment

Based on the size and nature of G&L Consultancy Ltd it has been assessed that the risks of potential bribery may result from the following circumstance:

- Bribery of G&L site air monitoring analysts to influence the outcome of site clearance testing.
- Bribery of G&L site surveying personnel to influence the outcome of asbestos location surveys.
- Bribery of G&L laboratory analysts to influence the outcome of asbestos analytical work.

- Bribery of G&L Staff to ensure certain clients get awarded asbestos removal contracts as part of asbestos management projects.

Due Diligence

Due diligence must be carried out on an ongoing basis to quickly identify any potential cases of bribery. If a particular member of staff is always requested by a certain client, if any unusual results are identified or if certain analysts have a substantially higher pass rate on-site work than other analysts, additional investigations will be initiated.

This policy is issued to all staff by means of email and each person is required to read and sign a master copy in the presence of a Manager or Director. All members of staff are made aware that any breaches of this policy will be classed as gross misconduct.

The policy will also be displayed on the notice board in the main office.
